Self-driven Full Stack Software Engineer with hands-on experience in React.js/Redux, Node.js, Express.js, MongoDB and passion for API Architecture and Back-End Systems. **Committed** quick learner with Technical Acumen and specialization in Model Views Controllers structure, functional programming and Javascript. Strengths in **teamwork**, **analytical skills**, **communication skills**, **creative thinking skills**, **attention to detail**.

Technical Skills

Front-End : HTML5, CSS3, ES6, JQuery (AJAX), Bootstrap, User Experience

Back-End : Node.js, ExpressJS, Rest APIs, Python, Javascript, NPM

Database : Mongo,SQL(MySQL) , NoSQL, Relational Databases

Testing: Test Driven Development (TDD), Unit Tests (Jest), Integration Testing

Other : GitHub, Git, Amazon Web Services S3, Algorithms, Data Structures, Scrum(Trello), Foreign Languages (Fluency in Russian), MVC, Object-Oriented Programming, Cross-Browser, JSON, Coding

Experience

Bootcamp Certificate, *University of Washington, Seattle, WA* **Dec 2020 - May 2021**

A 24-week immersive program focused on gaining technical programming skills in a collaborative environment and learning development strategy.

My Mini Gallery(Backend) (App - <https://tinyurl.com/4umeu7ft>, Github - [tinyurl.com/3s3mhm8c](https://github.com/Amal31497/MyMiniGallery))

- Collaborate with a team of 5 to develop a full stack mobile responsive web application using Agile Software development and Scrum methodology
- Facilitate Rest Api integration on the front end by strategizing and implementing relational database schemas on server-side of the application
- Implement Heroku Cloud Platform and webpack for building and deploying the application
- Lead Kanban board for visual representation of the project's progress
- Develop best practices to ensure code consistency by establishing and eslint react.js library

Google Books Search (App - tinyurl.com/euktytn7, Github - [tinyurl.com/5n57dkm6](https://github.com/Amal31497/GoogleBooksSearch))

- Research Google Books APIs and integrated it into a Full Stack application connecting with mongoose schema and Rest Api
- Implement client side scripts to create React global state for interaction with the database

ReadMe Generator (Github - github.com/Amal31497/ReadMeGenerator)

- Automate high quality technical documentation generator of preformatted ReadMe.md file using fs and inquirer modules with Node.js

- Design unit testing for user input through careful validation specifications

Real Estate Agent, *Windermere Real Estate, Seattle, WA*

Jul 2020 - May 2021

Maintained strong relevance in the real estate market through personal advertisement and networking

- Complete 12-15 showings per week
- Assist with client communication and showings which led to 2 closings
- Host 10 open houses and built 20+ respectful relationships with incoming customers

Personal Trainer, *24 Hour Fitness, Seattle, WA*

Mar 2019 - Aug 2020

- Build a clientele consisting of 15 clients in 3 months by expanding scope and influence through effective communication and positive attitude.
- Develop personalized training and nutrition plans for each client 2-3 times per week
- Maintain 5-7 training sessions per day by adapting to availability of equipment
- Generate 10000\$+ in EFT sales per month on average

Education

Bachelor of Arts, Economics, *Indiana University, Bloomington, IN*

Sep 2016 - Dec 2018

Hands-on experience working on several personal projects in data visualization and econometrics involving Data Analytics and technologies like Stata and Matlab and Microsoft Excel VBA.

Prominent Course Work :

- K303 - Technology and Business Analysis
- E425 - Financial Economics
- E371 - Introduction to Applied Econometrics
